Hi John,
The documents that formed the basis of EPA’s decision to propose the Site to the NPL are posted on the following website, www.regulations.gov. Once on this website, enter “EPA-HQ-OLEM-2016-0434” in the search box. Once on this screen, select “Open Docket Folder.”

They are also available upon request from the EPA Region 2 Superfund Records Center located at 290 Broadway, New York, NY 10007; phone number (212) 637-4308.

Let me know if there is anything else that you need.
Regards, Larisa

Subject: Hoosick Falls HRS

Hello Larissa. I would like to obtain the CERCLA HRS package for the Hoosick Falls site, referenced in the EPA post at:

and quoted out below:

“In addition to the soil sampling discussed above, the EPA also conducted Hazard Ranking System (HRS) sampling in spring 2016 to determine if the Saint-Gobain Performance Plastics site located at 14 McCaffrey Street in the Village of Hoosick Falls, NY was eligible for inclusion on the federal Superfund National Priorities List (NPL), a list of the most serious sites identified for long-term cleanup. This HRS sampling effort included sampling of soil, groundwater and storm drains at the McCaffrey Street facility. The HRS is a system EPA uses to score and evaluate potential threats to public health and the environment posed by uncontrolled releases or threatened releases of hazardous substances, pollutants or contaminants. Sites that score at or above the required threshold qualify for listing on the NPL.

Based on the results of the HRS sampling, on September 9, 2016, the McCaffrey Street site was proposed for inclusion on the NPL. In the summer of 2017, the site was formally added to the NPL.”

Who do I contact to obtain?

Thanks. JD
